

# "FRUIT-A-TIVES" "MADE IN U.S.A."

This Wonderful Fruit Medicine Placed On Sale In New England In Response To Steadily Increasing Demand.

## Stupendous Success in Canada and England.

At last, you and thousands of other sick and ailing people are able to buy this marvellous fruit medicine, right in your home town, free of duty, at the same price at which "Fruit-a-tives" is sold in Canada.

"FRUIT-A-TIVES" came to the United States in response to a great public demand.

For several years, the people in this country have been using this remedy in steadily increasing quantities. Every day, dozens of letters were received at Ottawa from sufferers in the United States, enclosing the regular retail price for a supply of "Fruit-a-tives". Because of the custom laws, these friends of "Fruit-a-tives" were paying duty on every box. Yet they were content to do this because they were unable to obtain anything else in this country that helped them so much.

"FRUIT-A-TIVES" is the discovery of an English physician and it is the only medicine in the world made from the juices of apples, oranges, figs and grapes—combined with valuable tonics and antiseptics. It has proved its value in Indigestion, Dyspepsia, Constipation, Kidney and Bladder Troubles, Rheumatism, Sciatica and Lumbago, Headaches and Neuralgia, and all troubles arising from impure condition of the stomach, liver, bowels or skin.

These tablets may now be had from all druggists at 50c. a box, 6 for \$2.50, trial size, 25c., or they will be sent postpaid on receipt of price by Fruit-a-tives Limited, Ogdensburg, New York.

### Canada's Wood Pulp Supply.

Conditions in the newspaper and book-making business of the United States at present are of a kind that bring to consumers of paper a realization of the advantages of a world at peace. Federal officials charged with the duty of investigating alleged monopolistic control of paper supplies are busy at their task. Newspapers in many of the cities are doing one of two things, sometimes both. They are either reducing the number of pages printed, or they are raising the sale price, but usually the former; and in concert, city by city or trade by trade.

The difficulties of the hour are not so much those of finance as of manufacture. That is to say, it is not so much a detail of the ability of publishers to pay the high prices which the scarcity imposes as it is a question of their getting possession of the product, without which they cannot do business. In short, it is a question of fair distribution to a large number of claimants of a stock which evidently cannot meet national demands, if the latter are to be on the scale of the past. Hence there has to be a reduction of consumption of paper, the effects of which are reduction in the size of newspapers, and publication of only such books as are certain of sale to an extent warranting publication.

Canada's share in the present production of wood pulp for conversion into paper in the mills of the United States is such, in volume and value, as to make it beyond dispute that, were not the Dominion able to aid its neighbor in this way, the situation in the United States would be grave. When a nation imports for an industry, the annual output of which is valued at \$330,000,000, raw material making up 70 per cent of the total imports of paper-making stuffs, it is under obligation to a country that provides the supply, and that declines to take advantage of its neighbor's economic needs.

Whether the future is to show a continuation of the same source of supply for the United States manufacturer who thinks he must have the wood pulp for his business, and is not averse to getting it wherever he can, to the best pecuniary advantage, time will tell. Ottawa is likely to see some great debating, within a twelvemonth, on the fundamental aspects of trade as between the dominions and Great Britain, and between Canada and the United States. It may come to pass that import rates on wood pulp will be altered within a year. In any case, for the resources now available north of the line, the United States journalist and author should be duly grateful.—Christian Science Monitor.

### AMUSEMENT NOTES.

Real Vital May Robson Comedy at Barre Opera House Sept. 26.

A distinctly American comedy, redolent of the soil, entitled, "The Making Over of Mrs. Matt," will be presented at the opera house Tuesday, Sept. 26, with May Robson, that typical comedienne, in the title role.

The comedy is said to be uncommonly bright, the characters real and vital, and the story one that will find a response in the breasts of American women and thinking men. Yet without it tells a story in which love and sentiment predominate and laughter holds sway.

Miss Robson in the title role, through her personality, her facial expressions and the magic of her voice, are told, will triumph again in her portrayal of "Mrs. Matt," even more strikingly than she did in her former success, "The Rejuvenation of Aunt Mary." A splendid production and a capable dramatic company are being brought along by Miss Robson, so that both the atmosphere and locale may be properly staged.—adv.

### CONQUERS RHEUMATISM

IN A VERY FEW DAYS

It is an established fact that one-half teaspoonful of Rheuma taken once a day has driven the pain and agony from thousands of racked, crippled and despairing rheumatics during the last few years.

Powerful and sure; quick acting; yet harmless. Rheuma gives blessed relief almost at once. The magic name has reached every hamlet in the land, and there is hardly a druggist anywhere who cannot tell you of almost marvelous cures.

If you are tormented with rheumatism or sciatica, you can get a bottle of Rheuma from the Red Cross Pharmacy or any druggist for not more than 50 cents, with the understanding that if it does not completely drive rheumatic poisons from your system—money back.—Adv.

## What to Do for Itching Skins

There is usually immediate relief for skin itching, burning and disfigured by eczema, ringworm, or similar tormenting skin-trouble, in a warm bath with resitol soap and a simple application of resitol ointment. The soothing, healing resitol medication stops itching at once, and soon clears away all trace of eruption, even in severe and stubborn cases, unless the trouble is due to some serious internal disorder.

You need never hesitate to use resitol. It is a doctor's prescription that has been used by other physicians for twenty years in the treatment of skin affections. It contains absolutely nothing that could injure the tenderest skin. Every druggist sells resitol ointment and resitol soap. Resitol Soap softens tender skin and helps to make poor complexion clear, fresh and velvety, because it contains this resitol prescription.

### WOODBURY

Elwyn Boyce, 14-year-old boy, Met Bear on Nelson Mountain.

While Elwyn Boyce, a boy about 14 years of age, was returning to his home in Elmore on a bicycle, after spending the day with his aunt, Mrs. Maud Davis, he met a small bear in the road. It was at a lonely strip of road on top of Nelson mountain where he discovered the animal in the road not far ahead of him. The bear, being of a kindly disposition, shuffled off into the bushes, letting the boy pass. As the boy was considerably frightened, it is needless to say he lost no time in reaching home.
